Palo Alto, California 94304

Dear Dr. Lederberg:

I talked with the people in Antwerpen this morning. There has been no change as yet (3 weeks). I estimate from our previous experience with **animals** and the length of time it has taken for people beginning work in the laboratory to get low arginines that a period of at least two months, maybe three, will be required.

They are continuing to have trouble raising the cells derived from the children in culture. They hope to send me some in a couple of weeks.

I **have now had** time to read the copy of your paper in detail and think you have done a tremendous job in laying out the problem, possibilities, etc.

With best regards.

Sincerely yours,

A handwritten signature in cursive script, appearing to read "Stanfield Rogers".

Stanfield Rogers, M.D.
Biology Division

SR:Mr1

The ASCA system looks really good
Thanks,
JS

STANFIELD ROGERS
